Special Telegram

Conference proposed to arrange
Roumanian affairs. Movement
threatens to spread.

ASSOCIATED PRESS TELEGRAMS.

VIENNA, 22nd.

Telegrams from Philippopolis announce the arrival there of Prince Alexander of Bulgaria, who was received with indescribable enthusiasm and saluted as liberator. City is illuminated and covered with flags.

Constantinople, 22nd.

War department very active with organization of army. Up to the present, however, there do not seem to have been any great movements on the frontier, to reinstate the former Turkish rulers.

Athens, 22.

A royal decree issued mobilizing entire Greek army.

London, 23.

The approaching international conference, to be held here for the arrangement of Turkish question, much discussed.

Bukarest, 23.

Complete mobilization of Roumanian army ordered, in view of struggle between the Ottoman Empire and states of Bulgaria and Roumania. Public opinion here favours the latter.

Palermo, 23.

The decline in the violence of the cholera noticed yesterday continues. In the last 24 hours 117 deaths.

THE SANTA CATALINA FARM.

This agricultural farm and veterinary establishment has been the subject of an important discussion in Congress, and after an excellent speech of Mr. Demaria, the Deputies voted a monthly subvention of \$20,000 to support that important school and staff. When we consider that the Provincial Government have spent no less than 400,000 \$ in placing that establishment on a footing that may compare favorably with similar farms in Europe; when we see that the utility of this great breeding establishment and veterinary school can be proved not only to the Province of Buenos Aires but to the whole nation, we can understand the unanimous assent of the Deputies in granting the subvention.

Madrid, 20th.—At the Cabinet Council, just held, it was stated that Yap had been formally occupied by the

THE CHOLERA.

cial bulletin showed 875 cases of cholera and 337 deaths.

Rome, 19th.—Within the last 24 hours 18 fatal cases of cholera have occurred in Palermo, and 20 fresh and 6 fatal cases in Parma.

Rome, 19th.—Within the last 24 hours 224 fresh and 180 fatal cases of cholera have occurred in Palermo.

Cholera is spreading in the most alarming manner in that city.

London, 18th.—A telegram from Derby reports a terrible catastrophe at the Oakfield Colliery, in Elkstone, eight miles from that town. Two hundred miners have been buried alive, the mouth of the mine having closed.

The most strenuous efforts are being made to rescue these unfortunate men.

Berlin, 18th.—The Prussian Government have rejected the propositions of the Vatican with reference to the vacancy in the Bishopric of Posen.

London, 17th.—Lord Salisbury has informed the owners of English vessels that the British Government will not be able to permit foreign Powers to exempt English vessels from quarantine.

Carlsruhe, 17th.—Emperor William, as a sign of his satisfaction at the late military manoeuvres, has decorated General Obernitz with the Cross of the Black Eagle.

Brussels, 18th.—No importance is attached by the International African Association to the rumour of the massacre of the Massaris Expedition.

New Orleans, 17th.—The Managing Committee of the North-Central and South American Exhibition, announce that the Exhibition Palace is now ready, and that all exhibits must be sent in as soon as possible.

Havana, 18th.—Government has issued orders for the strengthening of all the fortifications of the island.

Guaymas (Mexico) 18th.—Yellow fever is spreading. 122 cases, of which 20 proved fatal, have occurred since the beginning of the month.

The plague has appeared in Mazatlan and Tepic.

Quarantine is being enforced at Nogales. The heat is extraordinary.

Washington, 20th.—Preparations are being taken to prevent the introduction of small-pox from Canada.

Government has sent orders to all the coast-guard to detain vessels coming from infected ports, and not to allow the passengers, etc., to land, unless a clean bill of health be produced.

Rosario, 23rd.—The proclamation of Frondó's candidature is announced for Sunday next.

The Pta. S. has arrived from Tarragona with 550 cases of cholera.

Two robbers from Montevideo have been caught here by the police.

Montevideo, 23rd.—To-day is a day of national mourning, being the anniversary of Artiga's death. The official papers have appeared in black for the occasion.

The distinguished artist, Figueroa, has arrived from Rio de Janeiro, bringing with him several tableaux, which he will exhibit here.

Mdme. Albino's funeral takes place this evening, and will be largely attended. Her death will be much felt in this city.

The Europa arrives to-morrow.

The Lottery Managing Committee have published the names of the winners of the last big prize, in consequence of some ugly rumour.

Dr. Angel Costa's wife is gradually recovering.

Nothing new in political circles.

Montevideo, 23rd.—The Secretary for the Tribunal of Justice, Don Francisco Castro, is dying.

An Argentine, named José Mariago, has been fished out of the river. He appears to have received a deep wound in the neck. He is suffering from "enfermedad mental."

The death is announced of Mdme. Constal, wife of the editor of the *Siglo*.

Many brokers have arrived from Buenos Ayres. They leave on a visit to Dr. Pellegrini, who is in quarantine on Flores Island.

The Cosmos and Rivadavia sail this evening.

Rosario, 23rd.—Telegrams from Sta. Fe announce the instatement of the Frondista Club.

A petition was presented to Gov. Zavalla for the dismissal of Sr. Galvez from the Ministry. The Governor, in reply, stated he would take the matter into consideration.

Two young ladies of well-known families have eloped with their lovers.

La Plata, 23rd.—The disagreeable affair that took place on Sunday is in a fair way of being amicably settled, thanks to the mediation of Colonel Dantas.

The local papers have expounded hostilities. A new meeting will be called and a new Managing Committee will be elected.

THE SANTA CATALINA FARM.

This agricultural farm and veterinary establishment has been the subject of an important discussion in Congress, and after an excellent speech of Mr. Demaria, the Deputies voted a monthly subvention of \$20,000 to support that important school and staff. When we consider that the Provincial Government have spent no less than 400,000 \$ in placing that establishment on a footing that may compare favorably with similar farms in Europe; when we see that the utility of this great breeding establishment and veterinary school can be proved not only to the Province of Buenos Aires but to the whole nation, we can understand the unanimous assent of the Deputies in granting the subvention.

Madrid, 20th.—At the Cabinet Council, just held, it was stated that Yap had been formally occupied by the

THE CHOLERA.

ment, it is noteworthy that more than two thirds of the young men educated in the farm are from provinces of the Interior and from this capital, and upon which it will probably report.

The death is announced of Mr. John Walker, eldest of the well-known family of cricketers.

Rev. John Wordsworth, of Brasenose College, Oxford, has accepted the Bishopric of Salisbury.

Maudslayi's Court Circular contains the following:—The Right Hon. E. St. John, M.P., has been appointed President of the Board of Trade.

At a mass meeting of Forfar weavers it was resolved that they should not resume work unless the employers withdrew the reduction of 5 per cent in wages lately introduced.

The Commissioners of Woods and Forests have decided to replace and restore the celebrated running stream in Wye Valley, near Monmouth, which was overturned by a party of acrobats a few months ago.

A gentleman named Matthew, of Bristol, aged 22 years, was climbing the cliffs near Lord Dunsaville's seat in Glamorganshire on Monday afternoon, when he slipped and fell back on the rocks to a great depth below, and was killed on the spot.

The Duke of Richmond and Gordon is expected to visit Scotland.

The death is announced of Mr. Thoms, founder of "Notes and Queries," at the age of 81.

Mr. A. Collins, Q.C., appointed Chief Justice of Madras, will be knighted and other honours will be conferred.

An American gentleman staying at a hotel in Liverpool has been robbed of money and valuables left in his bed-room. The burglar was caught after a chase of some 200 yds.

At a special meeting of the committee of the Elbow Club, Chelsea, a vote of confidence in Sir Charles Dike was unanimously passed, and the meeting pledged itself to support him at the coming election.

The *London Gazette* of Tuesday announces that the Queen has been pleased to place the names of Admiral Sir Edward Southwell, K.C.B., and Edward Charles Johnson, Esq., on the Royal Commission appointed to inquire into the condition of the British Navy.

A telegram from Faramham states that a fire caused on common land at Faramham on the 10th instant by a boy applying a match to the dry grass, and which extended to the furze, is still raging, notwithstanding that continuous efforts are made to stop it.

At Derby on Monday night a Salvation Army procession was attacked by a mob, who broke the band instruments, and drove the retreating army to the barracks, all the windows of which were broken.

The *Times* correspondent at Cairo telegraphs on Monday—Gen. Greville has received a letter from Abdulla Khan, stating that Abdulla Khan, Ebnah and Mohammed al-Khor were killed at Khartoum, with their vakeels, in a riot on the 26th ult. He reports reinforcements coming from Berber. A letter was received at Khartoum yesterday from Tumbul saying that the derisives are in possession of all south of the Nile. They are 10,000 strong with 2000 horses. Said of Debbah has renewed Old Dongola and Handak. Tumbul implores assistance within 10 days or he will have to come north. He reports that the Mahdi and Khalifa Abdulla are dead. Kashem-al-Nofa writes on the 10th announcing Tumbul of treachery and correspondence with the enemy, and asking for 400 men to hold the Midrich. He has started North. General Greville considers it probable that there has been an advance of Derisives on Debbah, which has caused this right. Major Chamberlain telegraphed that Osman Digma was at Tanai. He is becoming a recluse, and says he is going to die and join the Mahdi at Mecca. A later telegram received last night from Major Chamberlain says that one of the Amer tribe who has come in, reports that Osman Digma has left Tanai. Before doing so he goes out that he was going to Kassa, but the Amer tribe believe that he has gone to Berber. Most of the Arabs have gone to the summer pastures. Major-General Dorman, chief of the staff of the Army of Occupation, left today for England, to take up an appointment at home.

The *Daily News* says:—Letters received on Monday contain particulars of some extraordinary floods which have visited parts of China and Japan, resulting in the loss of many hundreds of lives and enormous destruction of property. The floods are the most disastrous that have been witnessed for 30 years. For 80 miles round Canton the streets are under water, and many of the houses in Canton itself have been under water a whole week. On some of the rivers the water rose to nearly 50 feet above the normal level, and the strength of the current was so great that it was impossible for boats to get alongside steamers that were lying off Canton to load or discharge cargo. Large numbers of salt-pans and cargo boats were overturned and swamped, and the bodies of men, women and children, carcasses of pigs, furniture, and rats were seen floating in all directions. The greatest damage done was between Canton and Fatham. A large portion of the embankment of the river was carried away, and three villages were entirely submerged, most of the inhabitants being drowned. At Syli the water broke through the city wall, and it is stated that several thousands of people were drowned. The distress was very great; many families lost all they possessed, and the rice crops were seriously injured, and the rice crops were damaged to such an extent as to raise the price of grain by 25 cents per picul, or about 18 per cent.

The gold fever has broken out again in Victoria and New South Wales. A man Kerry having exhibited to greedy eyes both at Melbourne and Sydney some very heavy gold specimens which he stated that he had obtained from New Guinea, a company was started on a large scale in Melbourne for the purpose of sending an expedition to open up the reported gold field, and in one day all the shares were taken up. At Sydney, also, a "prospecting" expedition was preparing to sail for New Guinea. It is to be hoped that these rival expeditions will result in a friendly apportionment of the tract in which the nuggets are supposed to be hidden, and that the discovery will not be any trouble with natives in regard to it. In any case the discovery, if it should turn out to be an important one, can only be regarded with qualified satisfaction. There are diggers and diggers, no doubt; but it is certain that a good many of the men who are flocking to the gold fields are not men of the class who are best fitted to the foundation of a healthy development. The great new addition to the British Empire in Western Australia, having undertaken in a certain sense the supervision of the introduction of civilization among the Papuans, we should have preferred other pioneers to the work than the average gold-seeker.

The value of a vaccine office is apparent, and if the subvention granted increases vaccination, it will be money well spent. Although small-pox is a preventable disease, it is estimated that it takes off 25 per cent of the population. The following comparative figures, which we take from our Handbook, show the fatal neglect of the authorities and of the people:—

Per thousand deaths:—

England, 1885.

Small-pox, 1885.

Measles, 1885.

Old Age, 1885.

Phthisis, 1885.

Consumption, 1885.

The \$24,000 voted by Congress to support this vaccine office reduces the small-pox mortality, say, only one per cent, the advantage reaped is immeasurably more valuable than the insignificant sum devoted to the purpose, as we consider that an able-bodied male or female in this country may be put down at a value of \$250, say \$1000. These figures show the comparative insignificance of the amount voted by Congress.

Turning again to Mr. Demaria's speech, we see that the Santa Catalina Farm costs the Provincial Government \$140,000 per annum. The buildings of the farm at present in construction and contemplated will amount to \$150,000. The following words of the Deputy will be read with interest:—

"There is a farm in the world where a farm or veterinary school mounted on a better footing than that of Santa Catalina, nor is there another establishment that can boast of a superior course of studies or instruction." These are flattering words, and we think well deserved. They are a great compliment to Mr. André, the Head of the Santa Catalina Farm.

ANTWERP EXHIBITION.

Antwerp, Aug. 19.

The impression produced upon the hundreds of thousands of strangers that saw Antwerp and Brussels during the last few weeks must inevitably have been that merry young Belgium was living in a perpetual carnival.

This pageant-loving little nation has got up and successfully carried through one historical cortege and popular cavalcade after the other. Communal festivals and national jubilees have positively chased one another. Nor have they finished yet, for next Sunday the grand cortege of masses of transport from the earliest times of this city is once more to pass through the streets and boulevards of the metropolis.

A fine statue of Lieven Baeyens, burgomaster and immortal benefactor of his native city of Ghent some four score years ago, was unveiled on the 13th of last month at Belgium's Manchester. After having proceeded with out music and music, and with a splendid display, the *Obelisk* statue of Lieven Baeyens was unveiled with an average of fifty hanks per week of fifty-six and a half hours. His statue is one of the most interesting, and is much admired, in the gallery of machines at the Antwerp Exhibition. Close by, in the German Court, the exhibits of three well-known foundries exist general admiration, although but a very insignificant idea can be formed of their real importance by what they actually display. The *Obelisk* statue of Lieven Baeyens was unveiled with an average of fifty hanks per week of fifty-six and a half hours.
